

chanel bag replica

The object of the game is to make a choice on which hand, Player or Banker, will end up with a point value closest to nine (9).

An Ace has a value of 1, the 2 through 9 are face value and the 10, Jack, Queen, and King have a value of 0.

The total value of the hand is the last digit when the values of the cards are added.

$9 + 7 = 16$ and 6 is the value of the hand.

Customers may place a wager(s) on Player or Banker (Base Game Wager).

Players that have placed a Base Game Wager may also place a "Dragon 7" bet (three (3) card winning Bank hand totaling seven (7) points); P
